**Committee on Elections Report in Favor of Eustis—President Will Renew Nominations Left Unconfirmed.**

WASHINGTON, Dec. 5.—In the Election committee of the House three Republicans—W. H. Bishop, George W. Craven, and John C. Breckinridge—voted to refer back—one by Bishop, Republican, to seat Behard—one by Springer, Democrat, to seat Patterson. The committee will vote to-morrow. Majority and minority of the committee voted to refer to the Select Committee on Privileges and Elections are preparing a elaborate report on the Eustis case which will be presented to-morrow in elaboration of their resolution—6 to 3, that Eustis is entitled to a seat.

The President was again quoted by persons who visited him yesterday as saying that he would review all nominations upon which no adverse report had been made by the committees to the executive sessions. If this determination holds, all will be renominated except the New York Custom House officer, and Senator from Virginia.

House proceedings unimportant. General Ord, was before the Military Committee to-day. His evidence accords with that of other officers, to the effect that two additional regiments, one of cavalry and one of infantry, are needed for proper protection of the border. The examination continues to-morrow.

### Washington Notes.

WASHINGTON, Dec. 5.—Vice-President Wheeler, accompanied by Secretary Sherman, visited the White House to-day.

The Commissioner General of the Land Office, will issue a full list of sales, disposal of timber and timber lands in accordance with recommendations of the Secretary of the Interior and himself in their annual reports, which will provide for the withdrawal of all lands chiefly valuable for timber and not suitable for agricultural purposes, and will also have a general and pre-emption laws, and from the liability of being taken by any of the various kinds of land strip heretofore provided for by law. The bill will also provide for the sale of timber of certain kinds, real estate, and land with a view to a removal of the forest.

The new Democratic journal called the *Washington Post*, will make its appearance to-morrow morning, starting with a specimen issue of about ten thousand copies. The staff consists of Senator H. H. Thomas, president; John A. Cook, managing editor; A. C. Buell, editorial writer, and Messrs. Aiken and Marks associates. It is contemplated by the manager to adopt the plan so long practiced by certain influential newspapers, of purchasing news from outside parties, of purchasing news from outside parties, which will be a new feature in Washington journalism.

### Senator Patterson's Case Dismissed.

WASHINGTON, Dec. 5.—Judge Humphreys this morning delivered his opinion in the matter of John J. Patterson relator on habeas corpus, to be released from a warrant of arraignment and re-arrest of the Governor of South Carolina. There were present, among others, Senator Patterson and two of his counsel, namely Messrs. Cook and Shellebar, and Mr. Lowndes, attorney for South Carolina. The Judge's opinion was substantially to deny all the official duties, like all other members of Congress, and besides he had acted in the capacity of Senator years before the present indictment was brought against him in the South Carolina court. The writ was granted and the defendant discharged.

### Meeting of Horse Breeders.

NEW YORK, Dec. 5.—The first annual meeting of the National Association of the Trotting Horse Breeders was held here to-day. The report for the year showed that the Executive Committee had held twelve meetings, and the Association numbered ninety-five members. The Treasurer's report shows receipts of \$12,000 in contributions, \$9,727 balance in treasury, \$3,152. Officers were elected for the ensuing year, with Major McDonald, of Kentucky, as President.

### FRANCE.

**Reconciliation Improbable—Effect of Marshal MacMahon's Refusal to Receive the Merchants—Financing.**

VERSAILLES, Dec. 5.—Leon Renault gave notice that he would ask the ministry to explain the semi-official note which he had received, that President MacMahon's efforts to form a ministerial ministry, have been so far frustrated by an exhortant demand of the left that a Congress of the Two Houses should be held for the revision of the constitution. M. Grey said he was the only member of the chamber who had been summoned by the President, and he did not speak in the name of the left or indicate any conditions. The affair causes much comment. Several members of the left declared after the sitting that they had no idea of a Congress which had already been formed in private consultation, and had been seized upon the Elysée as an pretext for breaking negotiations for reconciliation.

PARIS, Dec. 4.—Midnight.—The bureau of the left of the Senate has issued a note formally denying that any Senator has brought forward a proposal to be accepted by the Republicans or commissioned by President MacMahon to formulate conditions for the formation of a Parliamentary Cabinet. Deputies of the left have issued similar declarations.

The *Moniteur* *Gardien*'s Paris special says:

"Marshal MacMahon's refusal to receive a delegation of merchants on Monday has caused great irritation." A Reuter telegram from Paris says:

"It is reported to-day in parliamentary circles that the government is fast failing, as the doctors thought, with consumption. I obtained a half dozen bottles of Quinine for my son, and am now improving at once, and is now well and strong. He took the discovery last fall."

Very truly yours,  
REV. ISAAC N. AUGUSTIN.

President MacMahon summoned the Duke de Andifret, Parquier and M. M. Grey and De Paule to the Elysée, but did not enter on a question of a new cabinet with any of them. He merely spoke generally, neither side formulating any of them. He then saw Senator Duclerc who had no mission or official status and asked him what the demand.

The details of this felony are not of a proper character for these columns, and we therefore refrain from particulars. It is sufficient to say that this negro, who is the son of a man for whom which this negro has made up the person of the girl in question, and that in both instances he has been foiled in his designs.

**Honest John Patterson.** The Court in Washington before which Senator Patterson's case was brought some days ago, has decided that he is not subject to the process of the South Carolina Courts during the term of his Senatorship. He is privileged from arrest; and can not be considered as a fugitive from justice, within the meaning of the statute.

The offence charged against the Senator is one of a very grave nature. It is this, that he bribed the South Carolina legislature to elect him U. S. Senator. Some days ago the special investigating committee appointed last spring by the General Assembly of South Carolina to examine, among other things, into the election of John J. Patterson as United States Senator in 1872, submitted a report.

The report gives an epitome of the testimony taken before the committee, including about forty ex-members of the Legislature, white and colored Republicans, whose evidence concurred in the statement that Patterson's election was secured through bribery. About twenty testified that they were bribed, either personally by Patterson or his agent, Worthington, receiving amounts ranging from \$100 to \$2,500. About twenty more testified that offers of bribes were made to them and refused. Elliott, colored, ex-member of Congress, who was Patterson's most formidable opponent, was offered \$15,000 to withdraw from the contest, which he refused to do. The offer was made by J. W. Dennis in the name of Patterson. Martin R. Delaney, (colored) was present and corroborated Elliott's statement. Gov. Moses afterward appointed J. B. Dennis Jury Commissioner to draw juries for the protection of Patterson when he was indicted in 1873 for procuring election by bribery, and the arrangement was successfully completed. Every witness testified that it was generally known and understood among the members that Patterson was purchasing his election. The evidence also shows that votes were bought while the election was in progress. Maxwell, a colored Senator, was paid to change his vote to Patterson, which gave a majority of the Senate and avoided the necessity of a joint assembly the next day.

The decision by which Patterson escapes justice may be in accordance with the law and the constitution, but it is a pity that the constitution and the law should be a safe bulwark of defense for a corruptionist and a thief. We had hoped that Wade Hampton would get his justice-dealing hand on this arch offender against all the laws of honesty and honor, and make an example of him; but not so. The lance of the law falls harmless on the Senatorial hide. The privileged rogue may mock at the South Carolina courts.

We have these difficulties set aside there is still an obstacle to its use. Most of the cotton belongs to other parties than those who raise it, long before it is gathered, and the farmer cannot sell the seed and sell to the spinner as he may want it, but must hasten it in a

factory running 1,000 spindles, making say 500 lbs of yarns per day. This amount sums up to 144,000 lbs for 12 months; to make this amount of yarns would require about half million pounds of seed cotton, and the cotton farmer would have little capital to invest in such an amount of seed cotton, and room to store it, unless it was more dry than it is generally stored in gin houses it would soon take a heat and be ruined and if dried enough to keep mice and rats could infest it.

We have these difficulties set aside there is still an obstacle to its use. Most of the cotton belongs to other parties than those who raise it, long before it is gathered, and the farmer cannot sell the seed and sell to the spinner as he may want it, but must hasten it in a

merchantable shape to satisfy the mortgages of Mr. Guano and Mr. Bell. He also wants the seed (about the one pound each) to be sent to him to compost and plant on another crop for the above mentioned friends.

For the above reasons I think it will not be long before the machine now in use for preparing cotton for the cards will be discontinued, though I am willing to admit that it may make more work, and a thread less stronger than the Clementine machine.

From the time Eve sewed big leaves to make aprons to the present, nearly 6,000 years, our mothers, wives and daughters used needles with the eye in the wrong end. Mr. Howe saw their error and put the eye in the pointed end, and a revolution was wrought. Mother Eve's needle is not entirely supplanted.

In regard to my mill, it is steadily at work making a nice grade of yarns. The last few days have been a hard time on cotton mills and will be, so long as vast quantities of cotton are made by factory labor. The South requires a division of labor, more cotton mills, wool farms, clove, and bacon farms, wheat farms, and less cotton farms.

The market has been glutted for years with cotton and cotton goods, and is not likely to improve. I think cotton farmers will make three and a half million yards of cotton when half that quantity would cost them not over half the expense and trouble to make it and bring these more money. When less cotton is made, then cotton will be sold at a half price.

Respectfully,  
JNO. T. BELLAMY.

### A North Carolina Emigration Agent in New England.

[Springfield Republican.]

Lawyer Neil Dunnont of Charlotte, N. C., well and favorably known hereabouts as the former efficient head of the Springfield weather office, is in this section as agent of the North Carolina Agricultural Agent. He came to employment with the State. He has lived there about a year, and speaks from the standpoint of a northern man. He likes the people, the climate and the country so well that he cordially recommends them. At the same time it is with sensible reservations. It is not without good reason that he has started now, but for good farmers with sufficient money to get a fair start, he believes there is a profitable opportunity in North Carolina. There is also room for small manufacturers. Land in large bodies can be bought for 60 cents, and there is average good land and \$3 and \$4 in abundance, and of course with meager improvements. Sensible people down there, as at the North, believe in Hayes, and there is no political persecution. The State needs good Yankee workers with capital, and proposes to hold out inducements to get them. Dr. Jones addresses himself to such, and will speak in many western Massachusetts towns, in Connecticut, in New York State and parts of the West.

A Woman's Wish.

We were lying in the field of clover,  
Over cool and soft and soft and sw et,  
With dusky clouds in deep skies hanging  
Over.

And still silence at my head and feet.

For one hour to slip the leach of Worry  
From eager haste, from Thought's impatience

As such it comes—in its heaviest hurry  
Leaving Wisdom's whistles—but my

beck!

All were sweet, where clover clumps are

Meeting—daisies hiding, so hide and rest;

Now except my own heart's sturdy beat-

ing, seeking it to sleep within my breast.

So lie there filled with the deeper breath-

ing, the comes of listening to a free bird's

song; we require at times full unfeath-

ering—swords will rust if seaboard keep too

long!

I am tired so tired of right duty!

But all my tired soul can't do it!

I am faint, for some of life's beauty,

whose beads with a straight string running through:

And laugh if you will at my crude

and women sometimes die of such a greed;

Die for the small joys held beyond their

And the assurance they have all they need!

A Wisconsin paper complains of the "scampering magnanimity of a penurious municipality" which refuses to erect street-lamps to guide the wayward feet of belated citizens.

It is asserted that there is something canine in Gambetta's brow, shad by long, dishevelled iron gray locks. Though not yet forty, he looks fully fifty. He has a broad and massive figure, and gives an impression of immense latent strength.

In Lancaster County Pa., on Thanksgiving Day, a youth named Milton Helleboorn, a shift a pistol from our pocket to another, while the weapon was discharged, the ball striking Miss Ida Neal, aged 15 years, in the temple, causing her death in half an hour.

The latest Kentucky romance is thus epitomized by the Louisville Courier-Journal: "Isham Dalton and wife, of Ballard county, separated, she taking an only child, a girl of 8 summers, and a mule, their only live stock. Last week he brought suit for the possession of the child, but accepted the tender of the child as a compromise."

General Miles says that Chief Joseph is a man of great tact. He has never sown, and he conducted against the whites a careful, skillful and humane campaign. The General shares in the opinion that the Nez Perces were defrauded and forced into the war. Now they have lost everything but their clothing and their scalps. One of the old men, had \$20,000 in the bank when the war began, \$6,000 of it in cash.

The Duke of Norfolk, who was lately married to Lady Flora Hastings, gave his bride a pearl necklace once owned and worn by Queen Mary, of Scotland. The bridegroom is Premier Duke and hereditary Earl-Marshal of England, and by virtue of the latter rank attends all great court ceremonial with his Earl's livery. He is not the leader of the English church, but the recognized leader of the English Roman Catholic laity. The new Duchess is a convert to that faith.

Baltimore Sun: Wendell Phillips denounces President Hayes as a "Northern snob" bowing down to the Southern people to obtain their favor, is on a par with the denunciations of the President by Senator Patterson. Neither Phillips nor any other man in the South is aware of ever smelling gunpowder in the late war. Phillips never exposed his precious person in a contest in which Hayes freely shed his blood. Yet the stay-at-home patriot denounces the fighting man as a "Northern snob."

Miss Grace Vernon Buswell is a young English lady only sixteen years old, whose name ought to be known and honored wherever the word "courage" is uttered. Having been twice plied and captured, Miss Buswell rode on horseback down a steep cliff at full speed to the scene of the disaster. She rode into the sea, and succeeded in reaching the boat, accompanied by her servant, and with as many women and children clinging to her and her horse as possible, safely, saving the lives of all placed them in safety. The Royal Humane Society has awarded the brave girl a silver medallion, with a bronze medal to her servant, who saved a man.

**Bay Line Freight in Steamer to Wilmington.**

The Norfolk Virginian of Sunday says: "The fine large steamer 'Metropolis,' chartered from New York company, arrived here last night. She is to make connection with the Bay Line steamer from Baltimore, and go to sea for all freight for the W. & W. R. to Wilmington for shipment to the stations on that railroad. Apropos of this, several of the railroad clerks in this city connected with the Atlantic Coast Line will leave for Wilmington, N. C., tomorrow morning to conduct the business of the company."

**Butler of South Carolina.**

[From the Independent.]

Walking across the floor to these two is a man who looks like a lamb, rather than a destroying angel—a hand-some man, of good height and figure, seeming a refined gentleman, with fine, gentle manners, and a frank, open, and extreme amiability. He looks neither Southern nor Northern, but simply a gentleman. It is easy enough to associate him with household loves and Sunday-school celebrations; with matinées never. This is M. C. Butler, of South Carolina.

**A Wretched Existence.**

Other conditions being equal, there is no reason why a healthy man should not enjoy; and it may well be doubted whether a man who has the power entirely to destroy the happiness of others, and especially and whose digestion is good. But for the sake of the poor, dyspeptic invalid, there is no comfort in life. He is indeed a wretched one. But he should not despair of a cure. There is a simple, restorative, Hostetter's Stomach Bitter, which gives a most healthful vigor to many a well-supposed invalid, and cures him of his debility and broken down physique, and gives him a sovereign remedy for dyspepsia, nervousness, rheumatism, sciatica, gout, biliousness and kidney and bladder difficulties. It eliminates from the blood the acrid elements, cheers and relieves the aged and infirm, and may be used with great advantage by ladies in their confinement. It is a truly miraculous to the use of invalids.
